JavaScript   Node.js

TypeScript   PostgreSQL

React   Svelte   Next.js

Tailwind CSS

Past projects

Open Merchant
Open source, self-hosted frontend agnostic ecommerce solution

Backo
Decentralized crowdfunding membership platform that rewards contributors with custom ERC20 tokens

---

Education

Consensys Academy
Blockchain Development
2020

Next Academy
Full Stack Web Development
2019 - 2020

HokuCare
Cofounder, Software Engineer
December 2023 - Present

- Designed, developed and deployed a healthcare practice listing site to connect doctors and patients

  Node.js   PostgreSQL   Next.js   Tailwind CSS

WeAcademia
Cofounder, Software Engineer
December 2020 - Present

- Designed, developed and deployed an e-learning platform with a smart learning assistant

  Node.js   PostgreSQL   Svelte   Tailwind CSS

Shani Entertainment Limited
Senior Frontend Developer
May 2022 - August 2022

RedSquare Software
Senior Software Engineer
October 2021 - May 2022

- Led the development of the Monsta Infinite (blockchain game) Marketplace V2 rewrite
- Made V2 more maintainable compared to V1 by adopting TypeScript for type-safety and developed reusable, customized Ant Design components
- Managed and broke down large project into assignable, reviewable Jira tasks that can be worked on parallel by multiple engineers

  React   TypeScript   Web3   GraphQL

Poet Farmer
Frontend Developer
March 2020 - December 2020

- Worked on more than 200 digital commercial campaigns for big brand name clients for WeTransfer
- Developed a no-code tool that enables designers to build WePresent wallpapers for WeTransfer without a developer. Reduced wallpaper development time from hours to minutes.

Yonsei University
Database Lab Research Assistant Intern
July 2018 - September 2018
